TECHNICAL SKILLS & TOOLING

Programming Languages & Frameworks

- Java
- Spring Boot
- React
- Vue
- Javascript
- Swift
- Python

Databases

- MSSQL
- PostgreSQL

Development Tools

- IntelliJ IDEA
- Visual Studio
- VS Code
- Webstorm
- Pycharm

LANGUAGES

- English

PROFILE

Detail-oriented software developer with hands-on experience in building and deploying full-stack web and mobile applications. Proficient in Java (Spring Boot), Vue, React, and Swift for iOS. Experienced in developing REST APIs, authentication systems, and responsive UIs. Passionate about creating clean, maintainable code and continuously improving in both backend and frontend development.

MY PROJECTS

DentalArtStudio (React)

Developed and deployed a modern website for a dental clinic with a fully functional email contact form. Implemented form submission directly to the clinic's email and ensured responsive design across all devices. Collaborated with client to match branding and improve UX. Live Demo: <https://dentalartstudio-ks.com/>

EventManagerment (Full-Stack - Vue & Java Spring Boot)

Developed a full-stack event management platform for creating, browsing, and managing events. Implemented JWT authentication, CRUD operations, and user/admin roles. Integrated PostgreSQL for data persistence and REST APIs built with Spring Boot. <https://github.com/eltonismaili/Event-Management>
<https://github.com/eltonismaili/event-managment-vue>

FitTrack (Swift - IOS)

Built a fitness tracking app for iOS with features such as workout logging, maps, and embedded web views. Used CoreLocation for user location tracking and MKMapView for routes. Implemented animations, gesture recognizers, and custom UI components in UIKit. <https://github.com/eltonismaili/FitTrack-Swift>

Attendance Tracking System (Java Spring Boot & Thymeleaf)

A web application to manage student attendance, sessions, and grades with proper validation, secure authentication, and role-based access. <https://github.com/eltonismaili/attendance-tracking-system>
